New Export Orders	42.6	Higher ▲	Contracting
Backlogs of Orders	44.8	Higher ▲	Contracting
Stocks of Finished Goods	46.8	Lower ▼	Contracting
Purchases of Inputs	51.8	Higher ▲	Expanding
Imports	47.0	Higher ▲	Contracting
Input Prices	56.8	Higher ▲	Rising
Ex-factory Prices	52.4	Higher ▲	Rising
Stocks of Major Inputs	47.6	Higher ▲	Contracting
Employment	49.1	Lower ▼	Contracting
Suppliers' Delivery Time	50.5	Unchanged -	Quickening
Business Expectations	57.5	Lower ▼	Optimistic

9 of the 13 sub-indices were higher than their respective levels in the previous month. For example, the new orders index rose by 0.5 pts to 51.4, while the new export orders index rebounded by 7.3 pts to 42.6 in June, indicating that new export orders have dropped at a slower pace recently. Against this backdrop, the growth of production activities has quickened: The output index increased by 0.7 pts from the previous month to 53.9 in June. Besides, the purchases of inputs index went up to 51.8 in the month, indicating an increase in purchasing activities. Also noteworthy is that the ex-factory prices index rose above the critical 50-mark, returning to the expansionary zone in June.

The suppliers' delivery time index came in at 50.5 in June, the same as in May. A reading above 50 implies faster delivery; below 50, slower delivery. The suppliers' delivery time indices of 'large enterprises', 'medium enterprises' and 'small enterprises' registered 50.7, 50.3 and 50.2 respectively in June.

The business expectations index went down to 57.5 in June from 57.9 in May.<sup>2</sup> The business expectations indices of 'large enterprises', 'medium enterprises' and 'small enterprises' were 59.8, 56.2 and 53.8 respectively in June.

---

<sup>2</sup> Since January 2017, a new method of seasonal adjustment to the business expectations index has been adopted; and accordingly, the historical readings of the index have been revised.

# PMI Report on China Manufacturing

## China Manufacturing PMI

### 中國製造業採購經理指數

China Manufacturing Purchasing Managers' Index (PMI) provides an early indication each month of economic activities in the Chinese manufacturing sector. It is jointly published by China Federation of Logistics & Purchasing (CFLP) and the National Bureau of Statistics (NBS). Fung Business Intelligence is responsible for drafting and disseminating the English PMI report.

Every month questionnaires are sent to 3,000 manufacturing enterprises all over China. The data presented herein is compiled from the enterprises' responses about their purchasing activities and supply situations. CFLP makes no representation regarding the data collection procedures, nor does it disclose any data of individual enterprises. The PMI should be compared to other economic data sources when used in decision-making.

3,000 manufacturing enterprises in 31 industries from Eastern, Northeastern, Central and Western China are surveyed. The sampling of the enterprises involves the use of Probability Proportional to Size Sampling (PPS), which means the selection of enterprises surveyed is largely based on each industry's contribution to GDP, and the representation of each geographical region.

There are 13 sub-indicators in the survey: Output, New Orders, New Export Orders, Backlogs of Orders, Stocks of Finished Goods, Purchases of Inputs, Imports, Input Prices, Stocks of Major Inputs, Ex-factory Prices, Employment, Suppliers' Delivery Time and Business Expectations. An index reading above 50 indicates an overall positive change in a sub-indicator; below 50, an overall negative change.

The PMI is a composite index based on the seasonally adjusted indices for five of the sub-indicators with varying weights: New Orders—30%; Output—25%; Employment—20%; Suppliers' Delivery Time—15%; and Stocks of Major Inputs—10%. A PMI reading above 50 indicates an overall expansion in the manufacturing sector; below 50, an overall contraction.

Currently there are more than twenty countries and regions conducting the PMI survey and compilation, based on an internationally standardized methodology.

## CFLP

### 中國物流與採購聯合會

China Federation of Logistics & Purchasing (CFLP) is the logistics and purchasing industry association approved by the State Council. CFLP's mission is to push forward the development of the logistics industry and the procurement businesses of both government and enterprises, as well as the circulation of factors of production in China. The government authorizes the CFLP to produce industry statistics and set industry standards. CFLP is also China's representative in the Asian-Pacific Logistics Federation (APLF) and the International Federation of Purchasing and Supply Management (IFPSM).

## NBS

### 國家統計局

The National Bureau of Statistics (NBS), an agency directly under the State Council in China, is in charge of the country's statistics. It is responsible for formulating statistical policies and establishing the national statistical system, drafting and enforcing the statistical laws and regulations, setting up and improving the national economic accounting system, conducting censuses, as well as making statistical analyses and forecasts of the macroeconomy, social development, scientific advancement, resources and environment.
